National Biodiesel Foundation is Now Clean Fuels Alliance Foundation

Foundation is renamed to reflect diversity and future of clean fuels

JEFFERSON CITY, MO - The National Biodiesel Foundation announced its new name, Clean Fuels Alliance Foundation today. The transformation to Clean Fuels Alliance Foundation follows the industry rebranding as a proven, innovative part of America's clean energy mix. During his announcement, Tom Verry, Foundation Executive Director, stated "We are excited to announce that new name as we continue to educate and support research activities for biodiesel, renewable diesel, and sustainable aviation fuels in the years to come."

"This new name better serves the Foundation's goals and clean burning fuels. Our education and research activities include all the feedstocks for America's domestically produced biodiesel, renewable diesel and sustainable aviation fuels." said Mark Caspers, Chair of Clean Fuels Alliance Foundation. "The Foundation started in 1994, and it is time to change the name to reflect our plans moving forward."

About Clean Fuels Alliance Foundation

Clean Fuels Alliance Foundation is a nonprofit 501(C) 3 organization. The Foundation works closely with Clean Fuel Alliance America, the U.S. trade association representing the entire biodiesel, renewable diesel and sustainable aviation fuel supply chain, including producers, feedstock suppliers and fuel distributors. Made from an increasingly diverse mix of resources such as recycled cooking oil, soybean oil, and animal fats, the clean fuels industry is a proven, integral part of America's clean energy future.
